## Eso potion maker not working

Does anyone have any experience using Daily Alchemy or Potion Maker? I have both these addons installed and they are supposed to make writs of alchemy when you open an alchemical schedule..... but they did nothing. I have no problem making writs usually, but it disappoints me that I have 2 alchemy addons used by the public and for some reason they refuse to work for me? I used a bug catcher and I didn't get any bugs.... addons just don't create writs? Anyone with this added problem? It worked earlier today but now it says I'm missing LibAlchemyStation. This is not something I can find on EsoUI though so do not know how I intended to install it. Also the page for Potion Maker on EsoUI doesn't work for me. Edit: So I found workaround. Looks like the LibAlchemyStation file is usually combined in the Added Potion Maker but this must be missing from version 5.8.0. So, I downloaded a zip file for version 5.7.9 of the esoUI (which page now works for) and copied LibAlchemyStation from the Lib folder and patted it into my Elder Scrolls Online Add Ons folder as if it were a separate addition. It seems to be working for now until the developer fixes it. Page 2 8 comments admin No Comment Stand-Alone Addons, TradeSkill Mods Overview: Potion Maker helps you create the position you want. Potion Maker allows you to find a position to make. It can also be a preparation to help you discover new features. Potion Makers looks through your available ingredients and uses your preferred filters, to create a comprehensive list of all the potions you can create with those features, using the reagents you have. This list is shown in the window and you can click on the potion to add the ingredients to the alkimia table. If you're using Potion Maker away from the alchimic table, you're instead getting more information about the clicked fill. Features: Redesigned UI (smaller) Using symbols with tooltip. An automatic search for alchemist writ (requested by QuadroTony) Favorites (requested by Xirael) Marks the position already in the Key-Binding bag for a Potion Maker toggle outside the craft station Updating search results when reviewing new alchemical items (for example, to see if there are new unknown features during training) Since 4.5: Integrations To Do: - No way of creating Favorites To create your favorites provides filters and search for positions. Once you've found a potion with the features you need, click the results line. There is a button to mark this adeue as a favorite. When you open Potion Maker, you don't need to set up a filter again and just click on Favorites. It depends on your addon settings, if alternative combinations, resulting in the same shaving, are offered additionally or not. Alternatives have different colored stars. Really: Continued Potion Maker or Potion Maker? Basically both additions do the same thing: Find potions for you. See this redundancy as some kind of backrest. The main difference is: Potion Maker Continued using a bush box with visible text (widescreen). Potion maker uses symbols with tool tips (small screen). In Extended Potion Maker, you need to constantly type text to find potion writ alchemist. In Potion Maker you have a one-click option to writ alchemist, only. In Extended Potion Maker, you can type any text to filter potions by name. In Potion Makers you can manage Favorites. The Extended Potion Maker has more style of desktop apps. The Potion Maker has more ESO style. It's up to your conference, which version suits you. Video review: Manual: To use Potion Maker, just use an alchimic table. Or you can type/potionmaker anywhere to bring it. Installation: Like most Addons, simply open the Archive and copy the contents into the %USERPROFILE% folder\Documents\Elder Scrolls Onlinelive\Addons\*. If the ESO is already running, perform \instruction reload\ui. Download the latest version of Potion Maker My Potion Maker recently stopped working for no apparent reason. I check/update addon via Minion every day, there is no red dependency listed ingame. I can't load Favorites, can't do Writs and can't craft manually (select material\properties manually and then press Search where the point is stuck in the search window. Elastic, I was able to use the Search function on an alt that hasn't learned all the reagent properties, but not at the main (crafter) that actually requires a position. Any idea what can cause this issue and how to fix it? Does anyone know a good addition capable of mixing the right poems? The PotionMaker maker added that I used for more than a year suddenly didn't work anymore. It continues to load while searching ..... Jimerio / Magicka Sorcerer/ PVP & PVE/Master Crafter (Woodworking, Blacksmithing, Alchemy, Provisioning, Leasing, Clothing) / DD & Cured / CP560 + / Aldmeri Dominion / PC/EU 6.2.5 Position Maker (for Alchemy Craft) DependenciesLibAddonMenu LibAlchemyStation LibAs LibCustomMenu LibMainMenu-2.0.Potion Maker v5.x.x Features: Includes craft poison for DLC Dark Brotherhood Since 4.0.0: UI re-design (smaller tips) Using symbols An automatic search for alchemist writ (requested by QuadroTony) Favorites (requested by Xirael) Marks the position already in the Key-Binding bag for a Potion Maker toggle outside the craft station Updating search results when reviewing new alchemical items (for example, to see if there are new unknown features during training) Since 4.5: Integrations For Hi Translator, everyone. If you want to set up a translation for a language that has not been included yet or requires being updated, feel free to do so. The only important thing the translation of the property name is: They must be written as shown in the game. Although bad translates or has typos. Thank you for your help. CU To Do - Transfer settings to the entire account. How to create Favorites To create your favorites set up filters and search for positions. Once you've found a potion with the features you need, click the results line. There is a button to mark this adeue as a favorite. The rest of you Your Poetry Maker doesn't need to set a filter anymore and just click on Favorites. It depends on your addon settings, if an alternative combination, which results in the same erosion, is offered extra or not. Alternatives have different colored stars.
